## WORK EXPERIENCE

### SDE - II TATA 1mg

06/2020 - Present

CHANDIGARH

www.1mg.com

#### Achievements/Tasks

- TATA 1mg is India's leading healthcare services company and is used by millions of users. Hence a great UI/UX throughout the product become a necessity. I work there as a frontend developer and convert business logic into code.
- Worked on DLS ( Design Language System) and created reusable components and widgets.
- Worked on pdp pages for improving performance. Identified the issues and then resolved them which improved LCP (Largest contentful paint) from 5.20 seconds to 3.5 seconds and reduced CLS (Cumulative layout shift) to 0.

### Software Engineer Jugnoo

07/2017 - 05/2020

CHANDIGARH

www.jugnoo.in

#### Achievements/Tasks

- Front-end engineer for company's main website. Made responsive website from scratch using HTML, CSS, Bootstrap, and Angular JS. Improved its SEO by adding meta tags and Implemented Structured data so that google can show rich snippets in search results.
- Designed and build full Taxi booking Web app.
- Worked on internal Admin web panels. Added new features and. changed the complete UI of one panel and implemented Angular material for better UI and UX.
- Worked with Google Maps. Drawing paths using directions API, plotting locations with markers , drawing polygons etc.
- Trainend and managed over 10 interns in front end technologies.
- Designed processes for cleanup and performance that minimized loading time by 35%.

## PERSONAL PROJECTS

### Budget Tracker

- Working Demo: <https://my-budget-tracker.netlify.app>
- Budget Tracker helps you track your financial activity efficiently. Its simple design makes it lightweight, straightforward and very easy to use. It's done in one click, because you don't need to fill anything except the amount. You need just a few SECONDS daily to save the amount and each spending purpose. No matter where you are just a couple of taps will save your expense.

### Burger Builder

- Working Demo: <https://my-burger-shop.netlify.app>
- Burger Builder is an application scripted in React and backend is deployed on Firebase , where users can order burger by choosing ingredients. You just need to simply create an account and login to order your burger.
